## McAfee University - Courses and course description

TRN-TCL5 (VS & ePO)

### VirusScan Enterprise & ePolicy Orchestrator (ePO)

This course provides extensive discussion and hands-on experience in the installation, configuration and maintenance of McAfee VirusScan Enterprise 8.7i, McAfee AntiSpyware Enterprise Module 8.5, and McAfee ePolicy Orchestrator 4.5. Through detailed lab exercises, participants learn to utilize VirusScan Enterprise 8.7i powerful advanced features and to deploy, manage and maintain anti-virus protection across the enterprise using ePolicy Orchestrator 4.5.

TRN-TCL3 (IPS)

### Network Security Platform (IntruShield)

McAfee IntruShield course is an essential component of a successful intrusion prevention strategy. Through hands on labs that mimic real world situations, this course turns knowledgeable administrators into intrusion prevention experts. The skills delivered in this course can be applied immediately, improving protection for your business and making certain that your investment in McAfee IntruShield realizes the utmost return.

TRN-TCL4 (DP & EE)

### Data Protection & Endpoint Encryption

The SafeBoot v5 Instructor-led course provides a comprehensive look at SafeBoot version 5, starting with an introduction to encryption basics and SafeBoot product overview. Key topics are reinforced using lab exercises to provide the student with hands-on product experience.

TRN-TCL3 (FS)

### Vulnerability Manager (Foundstone)

The Foundstone Enterprise Administrator training course teaches security professionals the more advanced intricacies of the Foundstone System. Attendees will learn how to install, configure and efficiently utilize all of the features and components of the Foundstone Enterprise system. By gaining a thorough knowledge of the system you will be able to navigate through the product feature set and learn to effectively employ the technology within your environment. Moreover, you will learn and reinforce vulnerability management best practice concepts, which enable more efficient remediation and risk reduction.
